

Rev. 02-12-2020

### Steel Spotting Cup Spacer

Part No. **PPP-SCS**

Package of 10

Steel spacer allows firm securing of lower cup halves, more positive results during tapping adjustments and reduces chance of central re-enforcement rib separation.

Spacer perfectly fits into new later designed spotting cups with re-enforcement ribs. Care must be taken when using spacer in used cups where distortion from previous bolt mounting is present.

Spacer cannot be used in older style, no re-enforcement ribs, spotting cups without modification
